Degree
in 3 years**

Eligibility

*10+2 from any recognized board.
Class 12th students appearing or waiting for
final result may also apply for provisional admission.*

Course Overview

The purpose of this programme is to equip students with the fundamental broad-based skills in graphic design, after which students learn to transform 2D graphics into the 3D world by creating interfaces and integrate programming abilities to illustrate the wonders of using multiple forms of Interactive Media.

Students are also presented with the opportunity to research multimedia design trends and issues within society to produce an integrated suite of design solutions, taking into account aspects of culture, economics and social interaction.

Roderick Simon Clark

Multimedia Design, UK 

Educated at Bath Academy and the Royal College of Art. Began career at Bath Museum Service, progressed to magazine design in London, worked at I-D, Sunday Times, various music (Underground) and fashion titles (i-D). Followed by corporate design with Landor and Wolff Olins for a number of years, then freelanced with London publishers and record labels. Taught design degree courses for 9 years then designed for hi-tech companies in the Thames Valley area, moving to Brighton in 1999 where he serviced international, national and local clients. His work encompasses information, editorial and corporate design and illustration.
